American Success Story

Be proud. Ratanjit is an American success story. He emigrated from India to the U.S. in 1968 with no more than a few dollars in his pocket to complete his Ph.D. studies in Polymer Chemistry. He soon became an entrepreneur, creating POLY-CARB, Inc. on a modern-style leadership paradigm in which team members are directed by the company’s mission statement, operating principles, and personal values.

Ratanjit’s Mission

Yes, a mission—a mission to give back. Having created tremendous wealth in business, his relationships and his family, and seeing the discontent, stress and depression so prevalent today, Ratanjit realized a desire to give back. And that’s what he is now doing. He has embarked on a mission to share what he has learned from his business experience, world travels, reading of countless books, attendance at many lectures and seminars, and most importantly, his interaction with family and friends. He has received international recognition and been honored with top awards from the NRI Institute, SALDEF, AIABG, Kent State University, The American Red Cross, and others.

The Causes of Stress and Frustrations

After many experiences, Ratanjit found that the cause is always the same—it’s because we become disconnected from the universal wisdom that exists around us and right within us.

Reconnecting for Success and True Joy

Yes, you can get reconnected. You can share the benefits of this way of thinking and you can do it right now. The stories and information in Ratanjit’s lectures have helped countless people! "Mr. Stress-Free"

"*Mr. Stress-Free!*" Impossible? Guess again. Through hundreds of challenges and adversities as the founder and CEO of a 34-year material science company, a professional speaker, author, radio and television personality and consultant, Ratanjit S. Sondhe remains Stress-Free.

Upon the release of *TEA: The Recipe for Stress-Free Living*, Ratanjit quickly became recognized for his work on living stress-free. The inspiration for *TEA* came during his international television program when Ratanjit was asked how to deal with stress. Ratanjit's response was to simply have a cup of TEA—and the rest is history.

Ratanjit understands that hidden under the millions of stress-causing labels that society has placed us we are naturally stress-free. Stress is simply a mechanism, which is really a gift to our human systems, that puts us on alert that something unusual is happening. It's this natural response that gives us a burst of energy and the strength to handle any situation. The problem arises when we remain in this mode for extended periods of time, which happens easily in today's fast-paced society.
